The IIMA Research Edge

The faculty at IIMA is widely recognized for their cutting-edge and ground-breaking research that contributes significantly to policymaking, shaping organizational landscape and facilitating informed decision making process. IIMA's specialized research centres are dedicated to advancing innovation and solving real-world problems through interdisciplinary collaboration.

About the Programme

The Blended Post Graduate Programme in Management (BPGP) at IIM Ahmedabad is a two-year, long duration career-acceleration programme leading to an MBA degree designed for experienced working professionals. Delivered in a blended format the programme integrates rigorous online synchronous sessions with immersive one-week campus module during each of the six terms.

The blended learning design allows participants to seamlessly balance professional careers with academic pursuits. While the programme delivery is primarily online, there are many interaction avenues through campus immersions as well as periodic meet-ups held in major cities across the country to allow participants to build meaningful connections and foster a sense of community.

Objective

The primary objective of the programme is to enable participants to strengthen their business leadership and entrepreneurial potential. The programme will enhance the participants' ability to contribute to organisational growth and innovation.

Curriculum

The BPGP curriculum comprises 900 hours of classroom sessions and project work, totaling 36 credits of coursework. The programme structure enables participants to develop both functional and organizational competencies, to navigate complex business environments. By integrating theory with practical application, the curriculum ensures participants gain a comprehensive understanding of management principles while sharpening their analytical and leadership skills. The programme design upholds the hallmark case-based pedagogy that defines IIMA's excellence across all its programmes.

The first year core curriculum focuses on equipping the participants with:

- ▶ High performance general management skills
- ▶ Understanding of the functional core areas of management
- ▶ Nuanced awareness of the business, economic and regulatory environment
- ▶ Analytical tools and techniques for effective decision-making
- ▶ A strong foundation for leadership and managerial capabilities

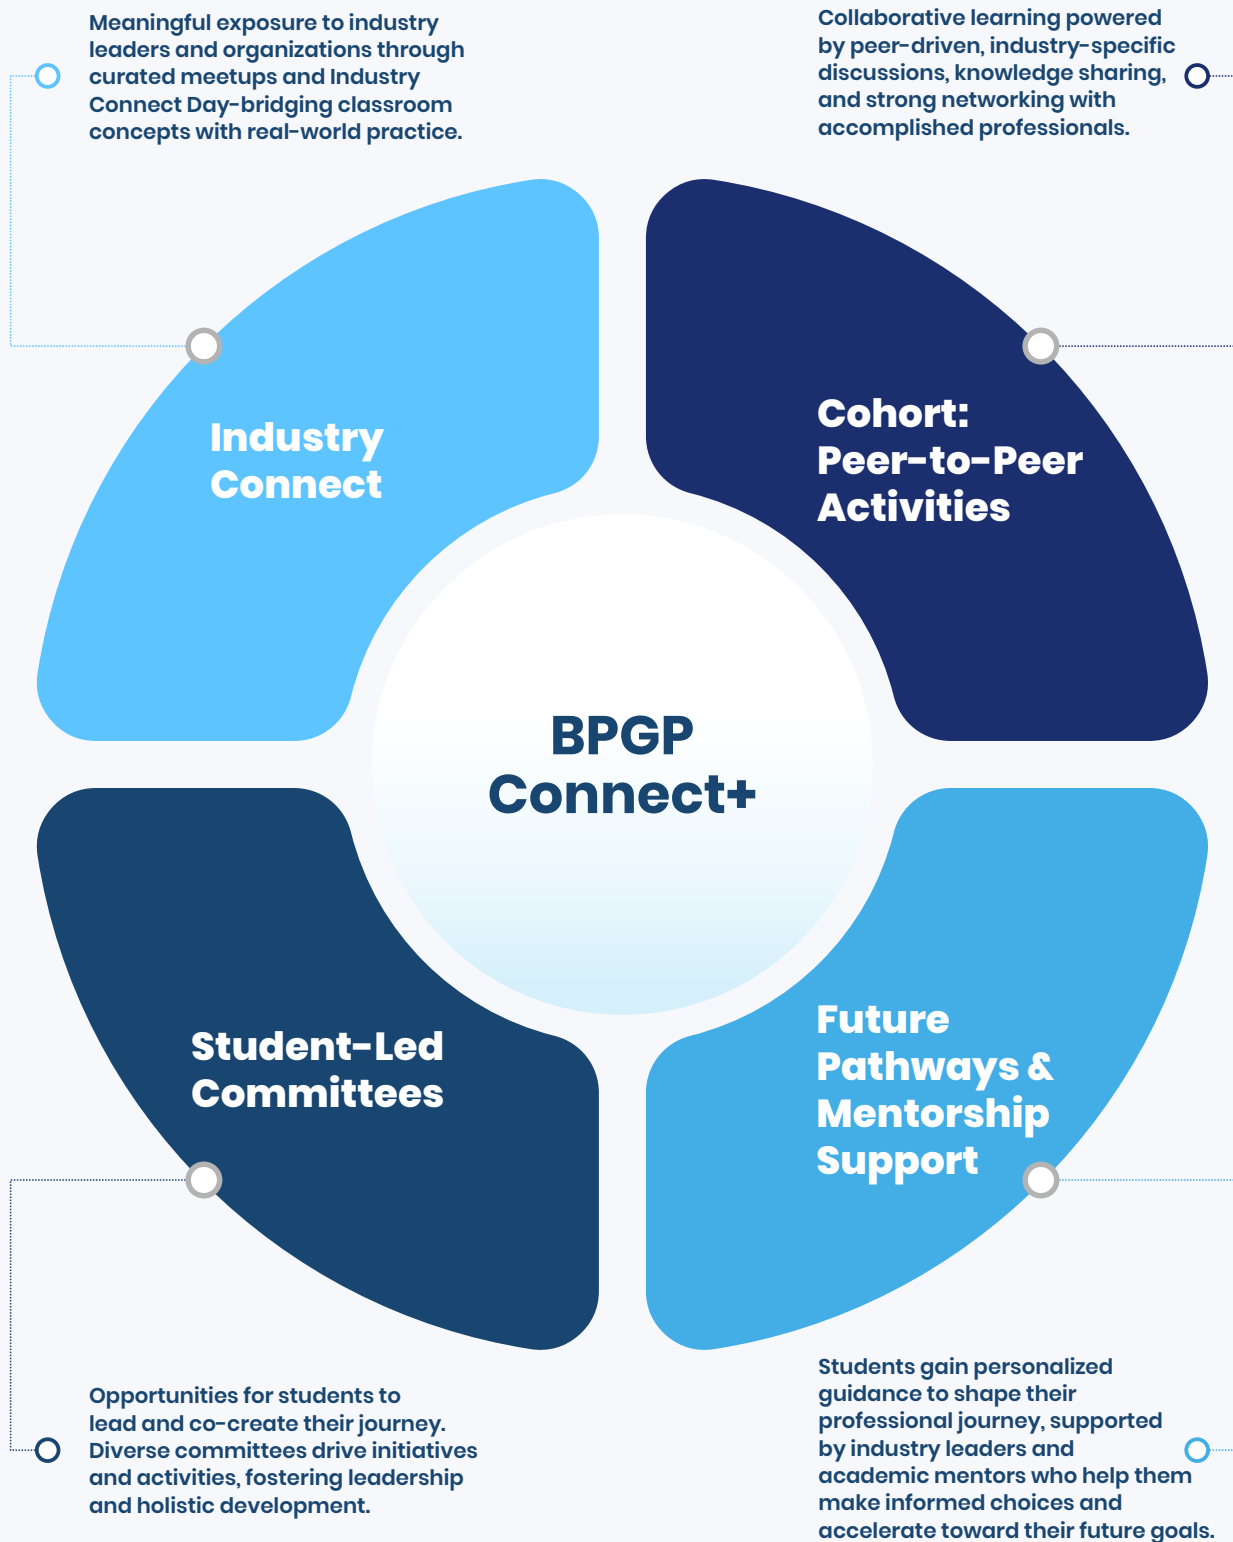

Upon completing the core courses in the first year, participants are introduced to the complexities of managing business organizations through elective courses in the second year. Each participant can choose electives from a broad range of subjects, including Finance, Marketing, Operations and Decision Science, Human Resource Management, Information Systems and Digital Technologies, and Business and Corporate Strategy, along with several cross-functional areas. These electives allow participants to specialize and develop expertise in their areas of interest.

Who should Apply

Best suited for individuals aiming to shape and lead high-impact organization

- ▶ Exemplary career & well-rounded accomplishments
- ▶ Ability to deal with a demanding learning environment
- ▶ Uniqueness of the profile in contributing to classroom discussion
